

**REMARKS**

This is the National Stage of an international application.

Thus, though a Preliminary Amendment dated June 23, 2006 was filed changing in paragraph [0032] "flux density as 490 mT" to read --flux density as 540 mT--, since this was a National Stage application of an international application, Applicants believe that better support would be provided by reference only to the International Application as filed.

Accordingly, Applicants return paragraph [0032] to its original form and amend claims 1 and 7 by replacing "540 mT" with --544 mT--. Support for 544 mT can be found at Table 1, pages 20-21, Sample Nos. 4, 8, 9 and 17 of Example 1 of the specification.

In view of the above, reconsideration and allowance of this application are now believed to be in order, and such actions are hereby solicited. If any points remain in issue which the Examiner feels may be best resolved through a personal or telephone interview, the Examiner is kindly requested to contact the undersigned at the telephone number listed below.

The USPTO is directed and authorized to charge all required fees, except for the Issue Fee and the Publication Fee, to Deposit Account No. 19-4880. Please also credit any overpayments to said Deposit Account.

Respectfully submitted,

Peter D. Olexy
